## PROFESSIONAL SUMMARY

Data Engineering fresher with 2 internships and 2+ end-to-end Azure pipeline projects, specializing in real-time data ingestion, transformation, and Power BI visualization. Proficient in Azure Event Hubs, Databricks (PySpark), Stream Analytics, ADF, ADLS, and Azure SQL Database. Designed Star Schema models and built interactive dashboards tracking 10+ KPIs for live retail sales analysis. Actively seeking a Data Engineer or Data Analyst Trainee role to contribute to data-driven business outcomes.

## TECHNICAL SKILLS

**Cloud Platforms:** Microsoft Azure (Event Hubs, Stream Analytics, Data Factory, Databricks, ADLS Gen2, Azure SQL Database), AWS S3

**Data Engineering:** ETL Pipeline Design, Real-Time Streaming, Star Schema Modeling, Data Warehousing, PySpark, Azure DevOps (basic)

**Databases & Query:** SQL, Azure SQL Database, SQL Server, MongoDB

**Analytics & BI:** Power BI (DAX, Interactive Dashboards, KPI Reports), Microsoft Excel (Pivot Tables, VLOOKUP, Charts)

**Programming:** Python (Pandas, PySpark), C

**Web Technologies:** HTML, CSS, React.js, Node.js, Express.js (MERN Stack basics)

**Tools:** GitHub, VS Code, Vercel

## INTERNSHIPS

### Data Engineering Intern – Edubot

Dec 2025 – Feb 2026

- Architected a real-time end-to-end retail analytics pipeline using Azure Event Hubs for streaming ingestion and Azure Stream Analytics for live data processing, reducing data latency to near real-time.
- Designed and implemented Star Schema data models (fact + dimension tables) in Azure Databricks using PySpark, improving query performance for analytical workloads.
- Loaded curated data into Azure SQL Database and built 3 interactive Power BI dashboards tracking 10+ KPIs including live sales trends, regional revenue, and inventory metrics.
- Stored raw streaming data in Azure Data Lake Storage (ADLS Gen2), establishing a scalable data lake foundation for both batch and real-time processing.

### Cloud Computing Virtual Intern – Corizo

Jan 2025 – Feb 2025

- Deployed and configured 2 static websites on AWS S3 by setting up bucket policies and public access permissions, achieving 100% uptime for hosted web assets.
- Demonstrated understanding of cloud storage architecture by implementing correct IAM-style access control and URL-based public hosting on AWS.

## PROJECTS

### Azure Retail Data Engineering Pipeline | *Azure Event Hubs, Databricks, PySpark, Stream Analytics, ADLS, SQL, Power BI*

- Built a production-grade real-time pipeline ingesting and processing streaming retail sales data across 4 Azure services: Event Hubs, Stream Analytics, Databricks, and Azure SQL Database.
- Implemented PySpark transformations and Star Schema modeling in Databricks, enabling structured analytical queries with optimized fact-dimension relationships.
- Delivered 3 Power BI dashboards with live refresh, monitoring revenue, sales volume, and product performance KPIs — reducing manual reporting effort significantly.

### Restaurant Website | *MongoDB, Express.js, React.js, Node.js (MERN Stack)*

- Built a full-stack restaurant web application with 5+ dynamic React components, client-side routing across 4 pages, and a configured Node.js/Express backend.

**Hospital Website** | *React.js*

- Developed a responsive hospital UI with 6+ React components covering departments, doctor profiles, and appointment forms, with client-side routing for seamless navigation.

**Personal Portfolio Website** | *HTML, CSS*

- Designed and deployed a responsive portfolio website on Vercel with 4 sections (Skills, Projects, Certifications, Contact), achieving clean cross-device compatibility.

**EDUCATION**

|                                                                                                         |                                |
|---------------------------------------------------------------------------------------------------------|--------------------------------|
| <b>Bachelor of Computer Applications (BCA)</b><br>PB Siddhartha College of Arts and Science, Vijayawada | 2023 – Present (Expected 2026) |
| <b>Intermediate – BIPC</b><br>Narayana Junior College                                                   | 2018 – 2020                    |
| <b>Class X – CBSE</b><br>Jawahar DAV Public School                                                      | 2017 – 2018                    |

**CERTIFICATIONS**

---

- Artificial Intelligence & Machine Learning – Eduskills – AICTE (2024)
- Cloud Foundations – Eduskills – AICTE (2024)
- Android Development – Eduskills – AICTE (2024)
- Python Programming – Programming Hub (2024)

**NOTABLE ACHIEVEMENTS**

---

- 3rd Place, Technical Quiz – Loyola College inter-college competition (120+ participants from multiple colleges)
- 1st Place, National Level Drawing Competition – recognized among top performers nationally
- Head Girl – represented and managed a student body of 1,000+ students; coordinated 5+ school-wide events including annual day, sports meet, and cultural programs
- Organized 3+ college-level technical and cultural events, coordinating logistics for 200+ student participants
